

# Grades 1-5

## SOFTWARE LESSONS

**BUNDLE**

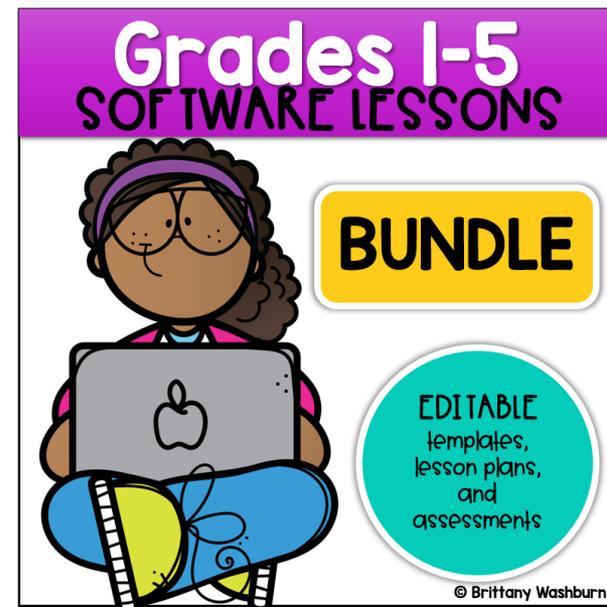

EDITABLE  
templates,  
lesson plans,  
and  
assessments

© Brittany Washburn

# Would you like to see a sample lesson plan and activity for each grade level?

Click here and then fill out the  
form to have 5 sample lessons  
sent to your email inbox

The sample files are in PowerPoint,  
so if you need them as Google Slides,  
just drag them into your Google  
Drive and they'll convert instantly.

# With this bundle, all the templates are provided to you to build assignments in your LMS

## Student Templates Provided

- Templates are provided in BOTH Google Apps and Office 365 for your convenience.

\*If you're using Apple Software then the Office 365 will convert to it.

# SOFTWARE LESSONS BUNDLE

What is included in each set of 12 lessons:

4 lessons for each type of software

- Google Docs, Microsoft Word, and Apple Pages
- Google Slides, Microsoft PowerPoint, and Apple Keynote
- Google Sheets, Microsoft Excel, and Apple Numbers

Customizable for whatever software version you have, for a total of 36 weeks of lessons per grade level.

Having 4 weeks of lessons for each type of software lets your students really become comfortable with it, and then reviewing the same program 2 more times during the school year means students won't forget it - spiral review.

2nd Grade Lesson 1		Presentation – Kites – Type Your Answer Template Knowledge Constructor 3c	
<b>Vocabulary:</b> Slide, template, format, type, text, table		<b>Objective and/or I Can Statements:</b> <ul style="list-style-type: none"> <li>• Be able to navigate presentation software efficiently.</li> <li>• I can add text to a presentation template.</li> <li>• I can find any letter on the keyboard.</li> </ul>	
<b>Materials:</b> Provide students with the presentation template			
<b>Lesson:</b> Using the prompts provided, students fill in the template with information about themselves. Add challenge by having students type full sentences for their answers. The template is editable, so you can add or take away questions if needed for your group of students.			
<b>Reflection:</b> How did the lesson go? Are there things you will do differently next time?		<b>Assessment Idea:</b> <ol style="list-style-type: none"> <li>1. Have students answer the lesson question from the Daily Message</li> <li>2. Have students fill out <a href="#">this google form assessment</a> (make a copy and then share YOUR copy URL with your students so that you can get the responses).</li> </ol>	
© Brittany Washburn			

2nd Grade Lesson 1		<b>Mini Lesson</b>	
<b>Connect</b> 1 minute or less	Presentation software can be used for many different things. Today we will use it to type our answers into the template.		
<b>Teaching Point</b> 30 seconds	Templates make it easy to fill in information.		
<b>Teach</b> 3-4 minutes	Point out to students where the features are that they will need in order to be successful in this lesson. <ul style="list-style-type: none"> <li>• Type in the text box on the title page</li> <li>• Type in the table on the second page</li> <li>• What to do if they make a mistake</li> </ul>		
<b>Instruction</b> 3-4 minutes	Demonstrate how to fill in the template. Show them how to delete out the text that is there and replace it with their response. Show students how to type in the table. This would make a great screencast so that your students can watch the video multiple times if needed.		
<b>Link</b> 1 minute	Say teaching point again  Remind students that what you demonstrated is A WAY not THE WAY. Encourage them to explore the tool.		
© Brittany Washburn			

## Editable Lesson Plans:

- Mini lesson directions to help you explain each lesson and skill to your students (you'll probably want to make a screencast for your students based on the specific version of the software program and the device they use but you can give a live demo instead if you want)
- Vocabulary
- Materials
- I Can Statements
- Lesson components
- Assessments (provided in editable Google Forms)
- Space for reflection

# Editable Daily Messages:

- Lesson Title
- Vocabulary
- Materials
- I Can Statements
- Lesson Question
- Space for you to add screenshots of your software program

## Kites Presentation Projects

**I Can Statements**

- I can add specific slide types to a presentation.
- I can add pictures, transitions, and animations to a presentation.

Add a screenshot from your version of presentation software here to show the toolbar and any other icons your students will need.

**Vocabulary**

- Slide
- Insert
- Template
- Format
- Transition
- Animation
- Theme

**Lesson question**

How can we create our own presentation about a topic?

© Brittany Washburn

2nd Grade

## Kites Copy and Paste Practice

**I Can Statements**

- I can copy and paste within a document.
- I can use the tools in a word processing program.

Add a screenshot from your version of word processing software here

**Vocabulary**

- Format
- Table
- Copy
- Paste
- Insert

**Lesson question**

How do we copy and paste in a document?

© Brittany Washburn

2nd Grade

# SOFTWARE LESSONS BUNDLE

## WHO NEEDS THESE TECHNOLOGY LESSONS?

These software lessons are perfect for technology teachers, classroom teachers, media specialists, STEM teachers, or homeschool parents who want their students to know how to use technology to *create* content. By mastering these software programs, students will feel comfortable doing anything you ask them to do with it.

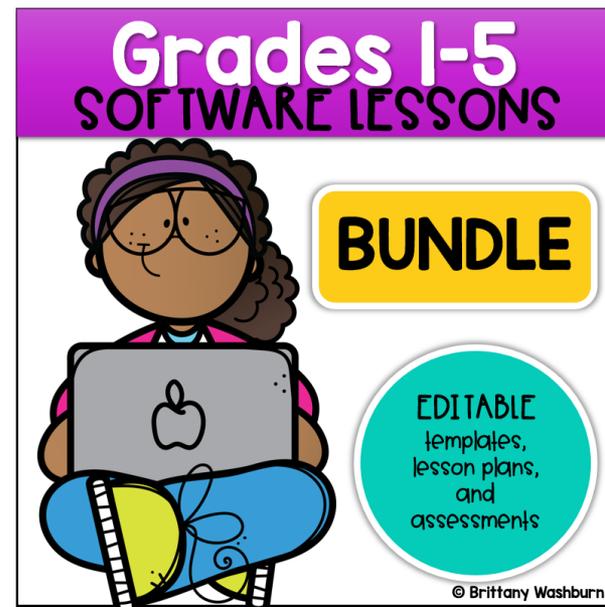

## WHY SPIRAL REVIEW?

We use spiral review in other content areas to make sure students remember important information, so why not do the same with technology skills? These software lessons are done in sets of 4 for each program and then we come back to the same skill 2 more times throughout the school year.

# 180 Lessons!

All you have to do  
is a mini lesson for  
each skill

Keep scrolling to see the  
scope and sequence for  
each grade level
